Edwin Muñoz

Software Engineer | Data Systems & Automation

Chicago, IL | linkedin.com/in/edwinmunoz9 | github.com/emunoz8 | CompilingJava.com | ioemunoz8@gmail.com

PROFESSIONAL SUMMARY

Software engineer and data systems specialist building internal tools, automation workflows, reporting systems, and cloud-deployed applications. Experienced in full-stack development and program operations, with a focus on improving data quality, reducing manual work, and supporting reliable decision-making.

EDUCATION

Master of Business Administration (MBA), Business Analytics Concentration — University of Illinois Chicago
Expected 2028

Bachelor of Science in Computer Science — Northeastern Illinois University
May 2024

TECHNICAL SKILLS

Programming: Java, C++, Python, JavaScript, SQL, Google Apps Script, Arduino/C++
Backend & Web: Spring Boot, REST APIs, authentication, JSON, API integration, full-stack development
Cloud & Infrastructure: Google Cloud Platform, Cloud Run, Cloud SQL, Git, GitHub, Linux, Bash, deployment pipelines
Data & Tools: Google Sheets (QUERY, ARRAYFORMULA, dashboards), Microsoft Excel, Google Forms, Microsoft 365, Google Workspace

TECHNICAL PROJECTS

Mentoring Program Data Management System — Internal Program Tools
- Designed internal tools for student participation, mentoring sessions, attendance, and program data.
- Automated recurring workflows with Google Apps Script, Google Sheets, and Google Forms, replacing manual tracking steps.
- Implemented reporting features for program evaluation, stakeholder reporting, and grant-related documentation.

Personal Website & Full-Stack Portfolio Platform — Personal Project
- Developed a Java/Spring Boot full-stack portfolio platform with REST APIs for project content and site data.
- Deployed backend services using Google Cloud Run and Google Cloud SQL and structured the application for maintainability and scalability.

World Cup 2026 Tournament Predictor
- Developed a Rust application to model World Cup group standings and dynamically generate knockout-stage matchups.
- Implemented qualification and bracket-mapping logic for 12 groups, including third-place advancement combinations.
- Built an interactive egui interface for entering results, viewing standings, and updating tournament predictions.

PROFESSIONAL EXPERIENCE

Program Coordinator / Youth Mentor — Options for Youth
November 2022 – Present
- Mentor high school students in academic success, social development, career exploration, and post-secondary planning.
- Coordinate mentoring schedules with school staff and support graduating seniors with resumes, job searches, college applications, and transition planning.
- Designed and maintained data tracking systems for student participation, attendance, mentoring activity, and outcomes.
- Automated attendance and reporting workflows using Google Forms, Google Sheets, and Apps Script.
- Maintain program documentation and reporting materials for staff, administrators, and external stakeholders.

Lead Diesel Technician — Loomis Armored
November 2018 – May 2021
- Led a three-technician team responsible for maintaining and repairing a fleet of 48 armored vehicles.
- Coordinated maintenance priorities with operations managers to reduce service interruptions and support route reliability.
- Diagnosed mechanical and electrical issues across diesel- and gasoline-powered vehicles and performed IDOT-required safety inspections.
- Managed parts ordering and inventory to support fleet readiness and timely repairs.

Diesel Mechanic (Corporal) — United States Marine Corps
October 2010 – July 2014
- Led and mentored Marines through technical training, accountability, performance guidance, and day-to-day supervision.
- Diagnosed and repaired military vehicles, including engines, transmissions, wiring harnesses, and electrical systems.
- Performed preventive maintenance and inspections to support operational readiness of vehicle fleets.
